

# Vodafone Modbus Cloud Connect

List of all available countries

## Attachment Country List (As of: 03.05.2023)

The following country list refers to the provision of connection services as a service component of the Modbus Cloud Connect product by grandcentrix GmbH.

Due to updates regarding roaming agreements and expansion of network infrastructure, this list is updated regularly. Provided are connection services for data communication (connectivity via Narrowband-IoT & LTE-M) from the Modbus Cloud Connect gateway to the customer backend. The choice of network technology as well as the availability of both network technologies is irrelevant for the service provision.

		Narrowband-IoT	LTE-M
